

Assignment 3 - 3D Scanning, 3D Printing

Due: before class February 14th

You will be given a variety of objects that you can choose from. Select one object. Then use the 3D scanner to generate a 3D model of the object. Export the 3D model as an stl file, and use one of the 3D printers to print the 3D model.

Use the following URL, account name, and password for a tutorial on how to use the 3D scanner to generate a 3D model of the scanned object:
