Basic information for the two texts

	Text 1	Text 2
Text Source:	EssentialsCurriculum.txt from you local drive.	MSNCurriculum.txt from you local drive.
First non-empty paragraph:	Integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations. Incorporate current and emerging genetic genomic evidence in providing advanced nursing care to individuals, families, and communities while accounting for patient values and clinical judgment. Design nursing care for a clinical or community-focused population based on biopsychosocial, public health, nursing, and organizational sciences. Apply ethical analysis and clinical reasoning to assess, intervene, and evaluate advanced nursing care delivery. Synthesize evidence for practice to determine appropriate application of interventions across diverse populations. Use quality processes and improvement science to evaluate care and ensure patient safety for individuals and communities. Integrate organizational science and informatics to make changes in the care environment to improve health outcomes. Analyze nursing history to expand thinking and provide a sense of professional heritage and identity.	Explore the meaning of self-care to caring nursing practice through development and implementation of a self-care plan. Explore selected caring theoretical models and the relationship to caring as the essence of nursing practice, education and leadership. Explore the concept of caring as it relates to the role of the advanced practice nurse in leadership and education roles. Examine the concept of caring as it relates to providing holistic care in a culturally diverse environment. Demonstrate the ability to communicate within a caring philosophy to improve nursing education, the quality of professional nursing practice and the health care system.
Second non-empty paragraph:	Healthcare economics and finance models. Advanced nursing science, including the major streams of nursing scientific development. Scientific bases of illness prevention, health promotion, and wellness Genetics, genomics, and pharmacogenomics. Public health science, such as basic epidemiology, surveillance, environmental science, and population health analysis and program planning. Organizational sciences.	The relationship between self-care and quality caring. Caring as the essence of quality nursing practice. Theoretical and evidence based frameworks for caring. Quality caring and cultural competence. Ethical decision making and caring. Caring in the context of nursing education and nursing management.
